**Train the
trainers**

SENAB
space for big ideas

Service
installation
package

To be able to give the installation team the best of prerequisites we can offer an education with the strategy “train the trainer”. We will gather a group from different local installations teams and a supervisor from Senab will educate them in the installation instructions, common questions/challenges on site and the furniture care kit. This will take place at one dealer and they install this site together to learn, after that they can educate their local teams for upcoming sites. They will get instructions to educate someone on site in the furniture care kit before leaving. This package enables the networks and several dealers to split the cost and improve the quality of the service and installations.

Installation	1 person/hour	55€
Installation overtime	1 person/hour	95€
